QUALIFICATIONS

- Worked closely with technical, creative and business teams while advising best practices for site functionality
- Experience assessing UX and UI designs for technical feasibility
- Experience with maintaining, optimizing, troubleshooting, and improving web applications
- Experience implementing responsive web applications and landing pages from concept through deployment

EXPERIENCE

ESTSOFT

Web Developer | October 2019 - Present

- Developed a new web application from scratch using .NET Core and jQuery.
- Integrated NodeBB forums with the main application.
- Worked with managers, designers, and an additional developer to implement a high quality user experience..
- Recommended and explained improvements in functionality, navigation, and UI/UX design elements.

NCSOFT

Web Engineer | April 2017 – October 2019

- Developed and maintained web applications, internal tools, and npm packages.
- Worked closely with designers to implement interactive experiences.
- Collaborated with stakeholders and QA to ensure delivery of quality products.
- Significantly reduced development time of html emails, forums, support sites, and game events by building internal developer tools.
- Worked with back-end engineers to integrate GraphQL and REST API's for web applications.
- Refactored several applications to increase performance and meet up to date standards.

LYNWOOD DEALS

Web Developer (Freelance) | January 2017 – April 2017

- Worked with a team to maintain and build new templates with Magento.
- Designed a new interface for inventory management.
- Assisted in the design and brand direction for the website and user experience.
- Responsible for the website, analytics, inventory management interface, and overseeing the work of two developers.
- Setup development process and workflow environment for all developers to follow
